<General>

Flow of Identity Verification with eKYC

01. Introduction (Flow of Identity Verification with eKYC)

- This manual describes the procedure of " Flow of Identity Verification with eKYC " in the Drone Information Platform System.
- Therefore, please refer to the manual when performing the necessary procedures.

02. Points to note when using the Drone Information Platform System

- If the operation of the Drone Information Platform System is interrupted (inactive state) for 60 minutes or longer, you will be required to restart the process. This security functions lowers the possibility of a third party viewing your screen and leaking your personal information while you are away from your computer or smartphone.

- If you are unsure of what information to enter in each form or how to enter it, hover your cursor over the ⓘ mark next to the name of the form item to see a description of the information to be entered in the form. (If you are using a smartphone, tap on it to display the description.)

- Do not press any browser buttons, such as "back" or "refresh", while using the system. Doing so may affect the normal functioning of the system.

- Do not attempt simultaneous login from multiple terminals; this may cause the system to malfunction.

- Please refer to the website of the Ministry of Land, Infrastructure, Transport and Tourism for detailed information regarding the unmanned Aircraft Registration System, the new system to achieve level 4, and other flight rules.
