01. Introduction (For Those Wishing to Apply for an Unmanned Aircraft Remote Pilot Certification by Agent)

- In the Drone Information Platform System, you can apply for various Unmanned Aircraft Remote Pilot Certificates, withdraw your application, reapply, and check the status of your application.
- This manual describes how to operate the Drone Information Platform System. Please refer to this manual when performing the necessary procedures.
- To deepen your understanding further, please refer to the [FAQ](#) page posted on the Drone Information Platform System in conjunction with this manual.

02. Matters that require attention when using the Drone Information Platform System

- If the operation of the Drone Information Platform System is suspended (inactive state) for 60 minutes or longer, you will be required to restart the process. This security function lowers the possibility of a third party viewing your screen and leaking your personal information while you are away from your computer or smartphone.
- If you are unsure of what information to enter in each of the forms or how to enter it, hover your cursor over the ⓘ mark next to the field name in the form, to see the information to be entered, as well as a description of the input information to be entered in the form. (If you are using a smartphone, tap on it to display the description.)
- Do not press any browser buttons, such as "Back" or "Refresh", while using the system. Doing so may affect the normal functioning of the system.
- Do not attempt simultaneous login from multiple terminals; this may cause the system to malfunction.
- For the unmanned plane registration system, the new system for achieving Level 4, and other rules of flight, refer to the [Ministry of Land, Infrastructure, Transport and Tourism website](#)

05. Step 1: Log in to the Drone Information Platform System (3/3)

The buttons for the various procedures in the "List of UA-related procedures based on the Civil Aeronautics Act" are shown below.

Clicking the buttons for the various procedures will take you to the top page of the individual procedures.

Procedure in the case of a specified flight

Procedure in the case of a specified flight

Check the procedure

The following specified flights require prior permission and approval. For details, [see here \(the website of the JCAB\)](#).

(Specified flights)

- Flights near an airport, etc., in air space for emergency actions, or 150 m or more above the ground
- Flights above a densely inhabited district
- Nighttime flights
- Flights out of the visible range
- Flights within 30 m of a person or property
- Flights above an event venue
- Transport of hazardous materials
- Object drop

It is also necessary to check the flight plans of the other UAs, the flight-prohibited air space, etc. and notify your flight plan before flying the UA. For details, [see here \(the website of the JCAB\)](#).

It requires prior UA registration, so if you have not registered your UA, perform "UA registration."

UA registration procedure

UA registration procedure

Check the procedure

UA of 100g or more is subject to the control of the Civil Aeronautics Act.
No flights of unregistered UA are allowed. After getting a registration ID for the UA, in addition to displaying a registration ID on the Unmanned Aircraft, the aircraft must be equipped with a remote ID function.

Start the UA registration application

Procedures in the event of an accident, etc. related to a UA

Procedures in the event of an accident, etc. related to a UA

Check the procedure

In the event of the following accidents, etc., the operator has to report the details of the accidents, etc. to the Minister of Land, Infrastructure, Transport and Tourism. For details, [see here \(the website of the JCAB\)](#).

"Accidents"

- Death or injury caused by the UA (serious injury or more)
- Damage of a property owned by a third party
- Collision or contact with an aircraft

"Serious Incidents"

- Recognized to have had a possibility of collision or contact with an aircraft
- Injury caused by the UA (minor injury)
- Situation that the UA becomes uncontrollable
- Ignition of the UA (limited to an occurrence during the flight)

Start the reporting of an accident, etc.
